

Invitation to Dystopi Seed Sale

Where do I send the USDT?

USDT Address:

0xBc7245864B47Fe4CB2138A7058786B38B4a8084d

Chain:

Ethereum Mainnet (ERC20)

Why should I buy Dyseum Token?

Dyseum (DYS) token will be the Dystopi Play & Earn NFT Game's driving force. You'll need to pay for supplies with DYS tokens, which will be required for the player to be able to mine further DYS tokens, therefore, demand will gradually rise alongside the number of players. The players who wish to buy tokens later on, will only be able to purchase them from those who participated and acquired them in the Seed, Private, and Presale rounds.

The price of supplies will increase by 15-15% in the first two years, and then by 8% yearly from thereon, which will also increase the demand for DYS, therefore inducing a price rise continuously.

The minable Dyseum (60% of the overall supply) will be placed in a so-called mining pool, where the system will distribute the daily rewards. In the first two years, there will be a daily amount of 123,287 DYS tokens distributed to players, and this daily amount will halve every second year, which will make sure that the tokens won't ever "run out".

On top of this, those who've participated in the SeedSale, PrivateSale, or PreSale and acquired tokens from them, will benefit from various discounts and promotions.

When does the SEED round start?

July 15th, 20:00 CEST

How can I buy Dyseum tokens?

You will need:

- A Metamask wallet (more details below)
- USDT, which will be the exchanged currency for Dyseum
- A few dollars worth of Ethereum, that will cover the transaction costs.

If you have all of these, you'll simply just need to send the correct amount of USDT to the wallet address above and you'll already have the token allocation that (based on the section below) you're eligible for!

What is token allocation?

The allocation is an indication of how many tokens you wish to purchase. The exchanged value of how many tokens are worth the amount you've sent in USDT will be publicly recorded on the blockchain, which will be visible to anyone.

What wallet do I need?

In order to receive a token allocation, and for us to send you the allocated Dyseum tokens at TGE, you'll need a Metamask wallet.

You can download the Metamask wallet here for your phone or computer:

Android

<https://play.google.com/store/apps/details?id=io.metamask&hl=en&gl=US>

iPhone

<https://apps.apple.com/bm/app/metamask-blockchain-wallet/id1438144202>

PC

<https://metamask.io/>

IMPORTANT!

We can only send the tokens on the **ETHEREUM MAINNET (ERC20) chain** on the wallets! A freshly installed Metamask will have this as a default option, so there is no need to change anything. In order for you to see your deposited amount of USDT, you are required to add the USDT (ERC20) contract to your wallet using the "Import Token" button. To do this, you just need to click on the button, and then type in 'USDT', and then click on the green icon that has a T letter in it, the Tether USDT logo. Then simply click on the import button.

We only accept USDT transactions that have been **rounded to a thousand!** It's also important to mention, that the transaction fee (gas fee) is paid by the sender, therefore you'll also need to possess a few dollars worth of ETH on your Metamask wallet. As long as you don't have that, you won't be able to send the USDT.

It's important that you send the exact amount, no more and no less!

How much token allocation will I receive?

This depends on which round you've secured your token allocation in.

SeedSale

In the SeedSale, we offer 3,000,000 tokens for a total of 100,000 USDT's worth. You can now calculate using this information how many tokens you'd like to buy for what price.

If your transaction arrives after the 100,000 USDT mark has been met, or it's an incorrect amount (e.g. 950 USDT), we will send the amount back instantly to where it came from as soon as it's received.

Example (1): 5,000 USDT = 150,000 DYS tokens.

Example (2): 1,000 USDT = 30,000 DYS tokens.

Minimum purchase value: 1000 USDT

PrivateSale

In the SeedSale, we offer 3,000,000 tokens for a total of 140,000 USDT's worth. You can now calculate using this information how many tokens you'd like to buy for what price.

If your transaction arrives after the 140,000 USDT mark has been met, or it's an incorrect amount (e.g. 950 USDT), we will send the amount back instantly to where it came from as soon as it's received.

Example (3): 5,000 USDT = 107,140 DYS tokens.

Example (4): 1,000 USDT = 21,428 DYS tokens.

Minimum purchase value: 1000 USDT

PreSale

Planned date: 2022. Sept-Oct

(The market sentiment will determine when it starts)

In the SeedSale, we offer 3,000,000 tokens for a total of 140,000 USDT's worth. You can now calculate using this information how many tokens you'd like to buy for what price.

Example (5): 5,000 USDT = 75,000 DYS tokens.

Example (6): 1,000 USDT = 15,000 DYS tokens.

Minimum purchase value: -

What will happen to the tokens that don't sell?

We'll "burn" them after the TGE.

When will I receive my tokens?

You'll receive the tokens after the TGE in installments according to the chart below:

SeedSale: 10% TGE + 15%/month

PrivateSale: 20% TGE + 20%/month

PreSale: 20% TGE + 20%/month

What is a TGE?

The Token Generation Event is an event that happens when the Smart Contract generates the tokens and sends them to the appropriate wallets. The transactions and wallet addresses during the SeedSale, PrivateSale and PreSale will be recorded to the smart contract, so when the TGE happens, the appropriate amounts of Dyseum tokens will be sent out according to the information provided above!

Why don't I get them all at once?

It would ruin the market if everyone could immediately throw all of their bought tokens at it. Therefore we'll distribute the Dyseum tokens using a time-phased vesting scheme to those who've participated in the first three rounds (SeedSale, PrivateSale, PreSale). Those who gain access to their tokens from a DEX or a CEX listing will not have time-based restrictions regarding their ability to either sell or buy the tokens.

What will happen to the USDT sent?

We'll launch an international marketing campaign with our partners and outside marketing teams, during which we'll open and upkeep different communication channels, create image and video-based content, expand the development team, and aside from that, the first NFT series' production will also start.

Where do I send the USDT?
